

## **Dig Safely**

The City of Corning actively participates in, and promotes the use of, Dig Safely New York. The mission of Dig Safely New York is to prevent damage to underground facilities. Once contacted, Dig Safely will notify local utility owners to mark out their infrastructure to ensure it is not damaged during digging operations.

The City conducts approximately 1,200 "mark outs" annually. Concerning the City's utilities, disruptions to water and sewer lines can result in an uncontrolled release of sewage into the environment and the possible contamination of the water supply.

More information on Dig Safely can be found at [www.DigSafelyNewYork.com](http://www.DigSafelyNewYork.com)
