

Alternate Side Street Parking

The purpose of alternate side street parking is to encourage the efficient flow of traffic for law enforcement, firefighting, and emergency medical services, as well as to improve efficiency for snow plowing, salting, street sweeping, leaf collection, garbage/recycling collection and street maintenance. It also allows City crews and private contractors to know where cars will be parked when they need access to underground utilities.

Instead of posting every street, which would be costly and unsightly, the City uses an areawide posting by installing regulatory signs at the entrances of the city. The City routinely enforces these regulations to maintain efficient traffic flows and ensure motorists are conditioned where to park, so access by City crews and contractors is not impeded when access is needed.

The City's alternate side street parking regulations are as follows, unless otherwise posted on the street:

EVEN SIDE OF THE STREET:

No Parking 12:01 am - 4:00 pm on Monday, Wednesday, Friday, Sunday

ODD SIDE OF THE STREET:

No Parking 12:01 am - 4:00 pm on Tuesday, Thursday, Saturday

The City encourages the public to comply with these important regulations to improve public safety and the delivery of other municipal services.
