

Toner Cartridges

To assist in reducing the amount of waste being disposed at landfills, the City of Corning has taken several steps to divert materials from the waste stream. One of these efforts, is to return computer printer toner cartridges to the manufacturer after they are empty.

Exposure to copy toner can cause skin irritation, rashes and eye inflammation. The proper disposal of toner cartridges can also keep toxic particles out of the atmosphere. The Environmental Protection Agency issues standards related to the safe disposal of computer printer toner cartridges. Most toner manufacturers offer recycling programs, so they can safely dispose of old cartridges.
